

Five Fun Facts About Crows

Did You Know?

- 1) Crows are really smart birds! They have big brains, the biggest compared to their body size. And guess what? They never forget a human face!
- 2) Crows can make tools and use them. They will find a good stick, sharpen forked twigs into hooks, and use it to scoop larvae and worms from holes in wood.
- 3) Clever crows hide their food. If they see other crows watching, they pretend to hide it. But when no one's looking, they keep it safe in their secret spot!
- 4) Crows have the same mate for life. They build their nests and look after their chicks together. 
- 5) Crows in various areas have their unique way of talking to each other, similar to how people in different regions have their own words. Did you know they have around 250 different calls?

CAW CAW CAW CAW!
